Science:

- Physics:
 - Newton's three laws of motion are:
 1. An object at rest tends to stay at rest and an object in motion tends to stay in motion with the same speed and in the same direction unless acted upon by an unbalanced force (Law of Inertia).
 2. Force is equal to the change in momentum per change in time. For a constant mass, force equals mass times acceleration ($F = ma$).
 3. For every action, there is an equal and opposite reaction.
 - Potential energy is the stored energy an object has because of its position or state, while kinetic energy is the energy of an object in motion.
- Biology:
 - Photosynthesis is the process by which green plants and some other organisms use sunlight to synthesize foods with the help of chlorophyll pigments. In this process, carbon dioxide and water are converted into glucose and oxygen.
 - Three major organs in the human body are the heart, brain, and lungs.
